

**Amendments to the Specification**

Please replace the continuing data on page 1 of the application with the following amended paragraph:

**Cross Reference to Related Applications**

This application is a continuation application of U.S. Serial No. 09/270,473, filed March 15, 1999, now abandoned, which is hereby incorporated in its entirety by reference.

Please replace the Abstract on page 25 of the application with the following amended Abstract:

The disclosed invention relates to a method of making polyurethane prepolymers which have improved moisture resistance by reacting an acidified isocyanate material with an active hydrogen containing material. The disclosed invention also relates to methods of manufacture of rebonded foam wherein the improved moisture resistant polyurethane prepolymers are used to bond polyurethane foam crumb.
